

The README describes how the model was trained and what the characteristics of the dataset are. Information such as how the dataset was generated and examples of images from the dataset should be included.

Response: I found that no matter how many times I attempted to train the model, the sample training data provided in the course was the optimal choice for training the model. Therefore, I used the sample data. Examples of the images are below:

Steering angle: 0

Steering angle: 0

Steering angle: 0

Steering angle: 0.1096026

Steering Angle: 0.1287396

Steering Angle: 0.1478767
